

AV-MC-HC3 Pro Marine Case

Designed for the most discriminating underwater videographer, the MC-HC3 is a rugged, reliable, high quality Marine Case for the Sony HDR-HC3 high definition camcorder. Suitable for wet weather, water sports, and underwater video applications to depths of 90 meters/300 feet, it is compact, easy to set up, and easy to use. Designed to be used with an accessory wide angle converter (supplied) it provides extreme wide angle of view – for dramatically clearer, more colorful underwater pictures. The dome port optical system corrects for distortions and aberrations that would otherwise occur, yet allows true, magnified macro and zooming functions - without having to change lenses or optical setup (to about 50% of zoom range - full range can be easily achieved with a diopter). An optional underwater color correction filter is also available.

One of the most important features of the MC-HC3 is the use of patented X-ring seal technology. The X-ring seal provides double sealing for extremely high reliability.

Clear endplates allow the user to clearly see the seals to easily verify that the seal has been made - before entering the water. The camera's LCD viewfinder is open in the housing and easily visible through the clear backplate. Since the housing acts as a sunshade it is much easier to see without the glare associated with rear mounted or external LCD's.

- Compact, professional quality high definition underwater video system
- X-ring double main seals for high reliability.
- Clear 1" acrylic endplates for full visibility of main seals.
- High resolution, fully corrected, dome port underwater optics.
- Heavy wall high grade PVC cylindrical main body combines the most pressure resistant design with a rugged and completely corrosion proof material.
- Stainless steel closure clamps provide quick and easy installation and removal of the camcorder, with a spring loaded safety locking feature, to prevent accidental opening.
- Optional SuperNova 250 lighting system - battery fits in housing with cable to external lamphead.
- Camera LCD opens in hsg. for full visibility through the clear backplate.

AquaVideo AV-MC-FX7/V1

- For: SONY HDR-HC3 HDV Camcorder
- Weight: 8 lbs. (11.8 lbs. w/underwater ballast weight)
- Length: 9.5 inches.
- Diameter: 7 inches.
- Displacement: 13.5 lbs. (This is the total weight of the system with camcorder, battery, wide angle lens, housing and ballast weight for underwater use.)
- Depth Capability: 90 Meters/300 feet. Greater depths are available.
- Standard Controls: Power; Trigger; Zoom; AutoFocus On/Off; Iris control optional - \$75 each

Price: **\$ 1399.00** (includes WA5000HD wide angle converter)
\$ 2599.00 AVHC3Propak2 (+SN250 Light system)

Optional SuperNova 250 \$1299 SN250 50 to 250 watt 24Volt 4.2 AHR batt.

Underwater Lighting System: Professional quality underwater lighting system includes SuperNova lamphead, 4.2 AHR NiMH Battery, Charger, mount arm. Battery fits inside housing, cable to external SuperNova lamphead.

SuperNova Lamphead 2.3" Dia. 4.8"L
 3400K (5800 with supplied 80B filter)
